ABOUT ME

Hello, my name is George Otgon and I study computer science in German at University Transilvania of Brasov. Currently I'm in the second year of study with little work experience, but I am a fast learner and can stand up to any challenge. Every day I seek to be a better version of myself and to acquire as many skills and knowledge as I can. I find myself to be a reliable and organised person, meeting every deadline and always keeping my word. Right now, I'm looking for a software development job, because it would mean so much for my personal growth. Working with me is really easy because I'm a friendly, outgoing and adaptable person. Thank you very much for your time!
